

Spine Atlas Initiative

Building a global spine atlas: Pioneering collaborative data calls to advance spine care.

**The registration
for the first call for
data is now open!**

Spine Atlas Initiative (SAI) Visualising Spine Care

Inspired by cancer registration across countries

Aiming at visualisation of

- epidemiology
- spinal services
- practice variation
- across countries

Low-barrier annual data calls

- One pathology (Lumbar Degenerative Spondylolisthesis LDS)
- Eight key parameters (Patient age and gender, Surgery date, Spinal stenosis, Grade of LDS, Decompression / Fusion / Stabilisation rigid type and level)
- All treated patients within 3 months (February to April 2025)
- Easy data submission (Excel or via established registries)

Individual benefits

- Group authorship in numerous articles
- Visibility of your service and network
- Understanding practice variation across countries
